

IN THE SPECIFICATION

Please replace the paragraph beginning at page 3, line 25, and ending on page 4, line 10, with the following rewritten paragraph:

al
According to another aspect of the present invention, a door for refrigerator is composed of a door panel made of metal, an inner panel combined with the door panel, a door cap fitting into the door panel and the inner panel in an upper portion, and a handle fitting into the door panel and the inner panel in a bottom portion. Furthermore, the door for refrigerator has a heat insulating foam material injected inside. Then, the door for refrigerator includes draw forming provided at a given position of the door panel. The door panel may have a two-tone color, and the draw forming may be provided on a boundary of colors.
